SUMMARY

As a multifaceted professional in the fields of data analysis, software engineering, and data engineering, I thrive on navigating complex challenges and finding innovative solutions. With a solid foundation in computer science, I excel at understanding intricate technical concepts and translating them into actionable insights for business growth. My passion lies in unraveling the potential of data to drive informed decision-making and fuel organizational success.

SKILLS

Languages: Python (fastAPI, flask, data science), SQL, R, Javascript (loopback, node, express), TypeScript.

Technologies: Spreadsheet, Excel, Postgresql, Microsoft SQL Server, Linux, BigQuery, Tableau, PowerBI, Scikit-Learn, GitHub, Git, Bit Bucket, Grafana, Prometheus, APIs, Google Cloud Platform, AWS, ETL (Extract, Transform, and Load), Exploratory Data Analysis (EDA), PySpark, Airflow, Azure Data Studio, Amazon Quicksight, Google Data Studio.

Soft Skills: Excellent communication, presentation, organizational, problem-solving, critical thinking, creativity, decision making and analytical skills.

WORK EXPERIENCE

Data Engineer

November 2022 - Present

Betty – Lagos, Nigeria (Remote)

- Collaborated with stakeholders to develop and maintain data dictionaries and data models, enabling efficient data analysis and reporting (using Confluence).
- Conducted user analysis, cohort retention analysis to identify patterns and trends in customer behavior (using SQL, Python, Amazon RDS and Amazon Quicksight).
- Designed and implemented ETL processes to extract, transform, and load data from multiple sources, resulting in a 25% reduction in data processing time and improved data accuracy (using SQL, Python, Airflow)
- Enhanced AWS utilization by monitoring and tuning performance constantly, ensuring optimal application availability and performance.
- Designed and implemented scripts to automate data processing and data quality checks, resulting in a 40% reduction in manual data processing and improved data accuracy (Using Python, SQL, Airflow).
- Designed and implemented data models, databases, and data warehouses for data storage and analysis in the cloud.

Business Intelligence Data Analyst

July 2021 - Present

Arnergy – Lagos, Nigeria (Remote)

- Developed dashboards, reports, and polished presentations highlighting findings and making recommendations based on current business intelligence data (using SQL, Power BI, Excel, and Python).
- Provided business intelligence and analytics expertise across multiple layers of the company's business portfolios; Operations monitoring, Solution design, Solution optimization, and periodic reporting for each of the functional energy installations to all customers.
- Created automated data pipelines, ETL processes and cron jobs using python, typescript and SQL for a more structured data centralized storage while refactoring older pipelines for space, time, and robustness optimization resulting in a 90% cutback of work hours.
- Implemented data tracking systems to better monitor and analyze system usage and management (using Prometheus, Grafana and python).
- Delivered valuable insights and enhanced management's decision-making capabilities by establishing and implementing well-detailed interactive storytelling (using SQL, PowerBI, Tableau, and Python) to improve decision-making.
- Conceptualized a credit-score self-service application that used APIs from the government and banks to determine repayment plans and credit scores for new customers, improving their signup and verification by 70%.

IT Specialist/Programming Instructor (NYSC)

April 2021 - March 2022

Ministry of Innovation, Science and Technology – Osun, Nigeria

- Designed and executed user training materials and in-house training for internal staff and incoming interns on data analytic tools and processes.
- Curated strategic plans, SOPs, business processes and guidelines to improve IT services and new business tools.
- Instructed interns on programming concepts (Python, SQL Server, Data Science, and Data Analytics).
- Fostered team collaboration between interns through group projects resulting in a 75% retention rate of interns.
- Evaluated and revised lesson plans and course content to achieve intern-centered training.

Product and Experience Designer

January 2021 - April 2021

BROOT Consulting – Lagos, Nigeria (Remote)

- Effectively carried out user research through targeted interviews and extensive usability testing, market research and analysis (using Excel and Python) to improve system design and customer experience before and after design.
- Collaborated with management and stakeholders on multiple functions including requirements gathering, presentations, and research.
- Created Personas, user stories, user journey maps, storyboards, and wireframes to identify and address user experience challenges and solutions and for the design of new products (using Figma).
- Led cross-functional teams in gathering requirements for the development of innovative user interface design, graphics optimization, navigation, site layout and usability design.
- Project managed the development and ownership of the interface from concept to implementation by turning requirements into user flows and visual mockups.

EDUCATION

Babcock University – Ogun, Nigeria

September 2016 – June 2020

B.Sc., Computer Science

CERTIFICATIONS

WorldQuant University

March 2023

[Applied Data Science Lab](#)

Corporate Finance Institute® (CFI)

September 2022

[Business Intelligence & Data Analyst \(BIDA\)™](#)

Corporate Finance Institute® (CFI)
