SUMMARY

- Disciplined and insightful data analyst with over 2 years of experience analyzing business and software processes.
- Experienced in collecting, transforming, and organizing data to make informed decisions and drive organizational growth.
- In my current role, I identified a major bottleneck, reduced work time for several processes by automating them to improve efficiency and reduce operating costs by over 20%.

SKILLS

Languages: Python, R, Javascript.

Technologies: Spreadsheet, Excel, Postgresql, Microsoft SQL Server, Linux, BigQuery, Tableau, PowerBI, Scikit-Learn, GitHub, Git, Bit Bucket, Grafana, Prometheus, Jira, Confluence, APIs, Google Cloud Platform, ETL (Extract, Transform, and Load), Exploratory Data Analysis (EDA), PySpark, Airflow, SQL Server Management Studio, Azure Data Studio.

Soft Skills: Strong communication, presentation, organizational, problem solving, and analytical skills

WORK EXPERIENCE

Data Analyst **July 2021 - Present**

Arnergy – Lagos, Nigeria

- Develop ETL pipeline for a more structured data centralized storage (using Python and SQL), resulting in a 90% cutback of work hours.
- Create monthly, quarterly, yearly, and per request analytics and presentations on business and system performance to help stakeholders and other members of the team understand how the business and systems perform.
- Investigate technical challenges to identify root causes and provide eminent resolutions resulting in customer satisfaction.

Programming Instructor (NYSC)

April 2021 - March 2022

Ministry of Innovation, Science and Technology – Osun, Nigeria

- Instructed interns on programming concepts (Python, SQL Server, Data Science, and Data Analytics)
- Fostered team collaboration between interns through group projects resulting in a 75% retention rate of interns.
- Evaluated and revised lesson plans and course content to achieve intern-centered training.

Product and Experience Designer

January 2021 - April 2021

BROOT Consulting – Lagos, Nigeria

- Effectively carried out market research and analysis (using Excel and Python) to improve system design and customer experience.
- Collaborated with management and stakeholders on multiple functions including requirements gathering, presentations, and research.
- Created Personas, user stories, and user journey maps for the design of new products (using figma).

EDUCATION

Babcock University – Ogun, Nigeria

September 2016 – June 2020

B.Sc., Computer Science
